

Lin & Associates' Three-Tier Navigation Menu

Efficient navigation through HMIWeb graphics is a crucial component to operator effectiveness. With Lin & Associates' dynamic Three-Tier Navigation Menu, graphic displays are a single mouse click away. This sophisticated menu is fully configurable, including vertical or horizontal layout, on-screen location, and choice of button colors. Alarm information is also integrated and displayed on the menu, and this stand-alone application can fit any screen layout conserving valuable real estate.

Key Benefits

- **Increase operator effectiveness**
 - Three-level display hierarchy for quicker process graphics access
 - Integrated alarm information displayed on the menu
 - Alarm propagation to guide the operator quickly to the correct graphic
 - Simplified access to critical tools within DeltaV, replacing the toolbars
- **Customized to your workflow yet easily maintained**
 - Engineering tools to customize and configure the menu to suit your operational needs
 - Complete user documentation
 - Consistent enforcement of site display guidelines
- **Included Tools**
 - Lin & Associates' Application Center to configure style and alarm indication colors
 - Engineering tools to build display specific alarm groups necessary to support alarm navigation
